

Fleet Inspect

Improve fleet safety with tailored equipment health solutions

Fleet Inspect is a digital inspection tool that provides your operators with access to pre-shift checklists, equipment inspections, and safety protocols, ensuring your entire fleet operates safely.

Main benefits

Reduce downtime with alerts on inspection failures

Improve operator safety with safety checklists

Customize inspections, checklists, and protocols

Reduce downtime and improve equipment health

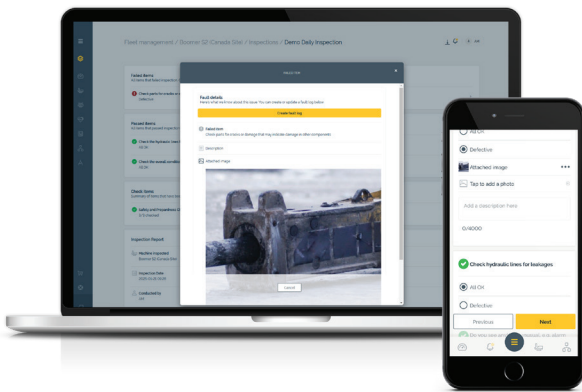

Hosted on My Epiroc

Your user-friendly and customizable portal to Epiroc, packed with powerful features and digital products. Accessible anytime, anywhere, across multiple devices.

Daily inspections by operators can identify wear and tear early, preventing safety risks and unexpected breakdowns. This proactive approach keeps your fleet productive and saves time and money.

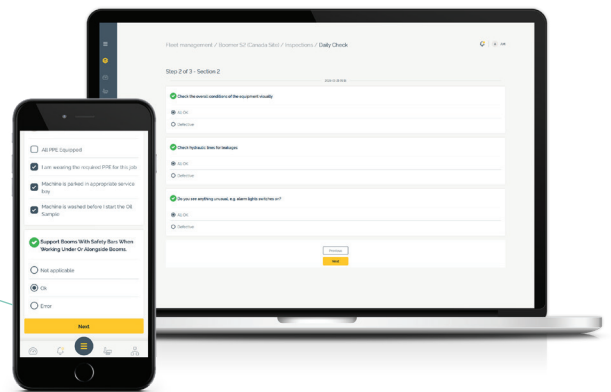

Switch from pen-and-paper inspections to Fleet Inspect on My Epiroc, where results are automatically synced across your organization. You can create custom inspections, turning your current protocols into digital formats. Operators can submit a fault log directly from their inspection and escalate any issues to your Epiroc contacts.

All completed inspections are stored on the equipment's timeline page, giving you a complete history of your equipment. This makes it easy to track maintenance and spot recurring issues. Plus, My Epiroc works offline, syncing with the system once Wi-Fi or LTE is available again.

Operators can add photos to any failed inspection item, which will give you all the information you need to quickly order parts, identify problems in the shop, or keep track of wear and tear.

Keep your operators safe with pre-shift checklists. These protocols can help you ensure that both your equipment and your operator are prepared for a successful shift.
